

Call for abstracts

From Science to Metaphysics? On the use of scientific knowledge and practices in order to propose an ontology of nature is the theme of the 4th workshop of the OLOFOS group. It will take place on May 11-12 2023 in Louvain-la-Neuve (Belgium) at the Institut supérieur de philosophie ([ISP](#)) of the Université catholique de Louvain ([UCLouvain](#)).

Note that any approach to this theme is potentially acceptable. However, contributions about the justification of using science in a metaphysical project will have the preference of the selection committee.

Invited speakers

Anjan CHAKRAVARTTY, University of Miami
Michela MASSIMI, University of Edinburgh

Submission of abstracts

Deadline

All contributions should be submitted **before December 21, 2022**.

Contributions format

All submissions must include an abstract (max 1000 words) entered directly on the submission platform in the appropriate input field.

How to submit

All submissions must be made exclusively electronically via the website:

<https://sciencemeta.sciencesconf.org/>

You will have to create an account in order to submit.

The program committee will inform contributors of results on **February 5, 2023**.
